

NexCall AI Voice Platform - Sample Document

This is a properly structured PDF file created to test document upload, text extraction, and RAG processing in your backend system.

Key Features:

- 1 24/7 AI-powered voice agents
- 2 Real-time call handling
- 3 Affordable solution for small businesses
- 4 Scalable architecture with cloud support
- 5 Integration with CRM systems

This document contains enough structured text to allow chunking and embedding generation. If your system works correctly, it should successfully extract this text and process it without errors.
